

Smart Expense Tracker for Personal Finance Management

1. Project Objective

Help users manage personal finances more effectively by tracking transactions, monitoring spending behavior, and controlling monthly budgets through automated budget alerts.

2. Problem Statement

Many banking users struggle to understand their spending patterns and frequently exceed monthly budgets due to limited financial visibility and lack of timely spending alerts.

This leads to:

- poor budgeting habits
- increased financial stress
- low engagement with personal finance tools

3. Proposed Solution

Develop a Smart Expense Tracker system that automatically categorizes transactions, tracks monthly spending, and provides real-time budget alerts when users approach predefined budget limits.

Key capabilities include:

- transaction tracking
- expense categorization
- monthly budget monitoring
- alert notifications
- spending dashboard visualization

4. Target Users

- individual banking customers
- young professionals
- university students
- mobile banking users

5. Project Scope

In Scope

- transaction tracking
- automatic expense categorization
- monthly budget creation
- budget alert notifications
- alert history
- financial dashboard

Out of Scope

- investment tracking
- loan management
- credit scoring
- wealth management

6. Expected Business Impact

The project aims to:

- improve user financial awareness
- reduce overspending behavior
- increase adoption of personal finance features
- enhance digital banking experience

7. Project Role

Role: Business Analyst (Mock Project)

Responsibilities:

- analyze business problems

- define feature requirements
- write BA documentation
- create process diagrams
- design wireframes
- perform SQL-based business analysis
- create performance dashboards
